Bespoke Steelwork

Adey Steel Ltd has come a long way since it was founded as a family business back in 1925. Though many changes have taken place as our business has evolved, our passion for offering a quality product backed up with outstanding customer service has always remained.

This brochure offers an insight into Adey Steel's Housing Division and the products and services we offer. To discuss any requirements you may have please contact our headquarters and speak to a member of our Housing Division sales team.

Making steel work since 1925

Structural Steel

We offer a range of services relating to structural steel. From cut-to-size supply only sections, to complex design and build projects erected by our specialist structural steel installation team.

Bespoke Steelwork

The high level of technical know how and skill required to service these five key areas means that we can tackle most steel related projects - be it fabricating from new or modifying existing steelwork.

Juliet Balconies

Choose from our standard range of designs and finishes offering glass or stainless steel options, or work with our specialist team to establish the ideal bespoke solution for your project. We offer a supply-only or full site installation service.

Stair Balustrade

A fully professional service takes your project through survey, design, fabrication, finish and installation. Whatever your required specification - be it mild steel, stainless or glass - our design team can work with you to establish your desired product. Alternatively, view existing drawings and images to select one of our many established products.

Walk-On Balconies

Helping create that all important outside space. As with Stair Balustrade we provide the complete package from the balcony structural frames and cantilever connections, to edge protection balustrading to the precise specification you require.

Railings and Fencing

With a large variety of designs and sizes, we deliver perimeter railings and fencing to sites across the UK, together with a full installation team where required.

Supply and Install...

This department specialises in the design, fabrication and installation of architectural and structural steelwork to the house building and construction industries. This enables us to provide our clients with solutions for all aspects of the steelwork package within a residential project.

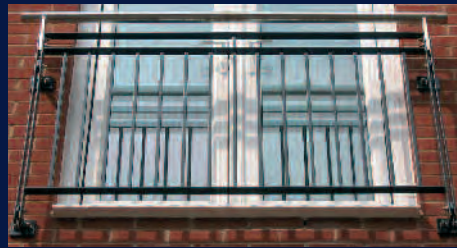

House builders' steelwork has been an integral part of Adey Steel Ltd for over 30 years, and our dedicated team of contract managers not only understand the fabrication processes but also the varied requirements of the house building and construction industries.

Continued investment in people and technology allows us to provide quality products and outstanding customer service while remaining competitive on both price and lead times.

Supply Only...

This department specialises in providing supply only steelwork to the house building and construction industries. Our extensive client base includes a vast number of national house builders as well as local independent companies.

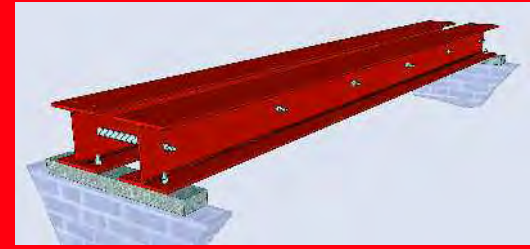

The supply of house builder steelwork has been an integral part of Adey Steel for over 30 years, and with our in-house stock holding and double shift system we can provide continued outstanding customer service.

Our investment in the latest CNC drill and saw line ensures that while we remain competitive, we are able to offer fast delivery on stock items and fabricated material using our dedicated in-house transport company Transport 24.
